

Logo Submission Guidelines

Saved From: <http://support.vridirect.com/article/logo-submission-guidelines-15.html>

Please use these guidelines and requirements when submitting your logo to VRI Direct:

- Logos cannot exceed 2000 x 2000 pixels. Ideally, your logo should be 1000 x 1000 pixels or smaller.
- Logos that are smaller than 100 pixels wide by 50 pixels high may be difficult to see clearly.
- We support .PNG and .JPG file formats. Other file formats should be converted to .JPG or .PNG format.
- Logos are displayed on white or off-white backgrounds. Your logo will look better if you save it with a transparent background, so that our background shows up when your logo is added to our system. If you have a logo that is normally on a darker background, and you would like to keep that background color, please submit your logo with that background already in the logo image.
