

Optimum Browser Cookie Configuration

Saved From: <http://support.vridirect.com/article/optimum-browser-cookie-configuration-21.html>

VRI Direct and Adobe Flash Player take advantage of your browser's *cookie functionality* to help remember your custom settings. When browsers are configured to delete cookies, some of your custom settings may not persist after you close your browser window.

For the best VRI Direct experience, we recommend that you add vridirect.com to your browser's list of "safe domains" and allow cookies based on that domain to be saved.

- Microsoft Internet Explorer:
 1. Go to Tools > Internet Options
 2. Click the **Privacy tab**
 3. Click the **Sites button**
 4. **Enter vridirect.com in "Address of website" and then click Allow**
 4. **Click OK to close the "Per Site Privacy Actions" window, then click OK to close the "Internet Options" window**
- **Google Chrome: Open your Chrome browser, then visit this link: <chrome://settings/content> -- make sure "Allow local data to be set (recommended)" is selected under Cookies**
- **Apple Safari: Click the Settings icon (top right, looks like a gear), then click Preferences..., then select the Privacy tab. Under "Block cookies", make sure that either "From third parties and advertisers" or "Never" is selected.**
